

Name:- PrincessBeulah Alexander

Learning Track:- Cloud Computing

Project:- Azure Free Tier Account Setup Complete Learning Program

Question:- A brief document (PDF) summarising the region I chose for my resources and a short explanation of how the Shared Responsibility Model applies to the resource I deployed.

Response:-

The resources group named "Assignment1" is located in the "South Africa North" region. The Shared Responsibility Model applies to my deployed resource as follows:

Both I & Microsoft share the responsibilities for security and compliance. Microsoft is responsible for the security of the cloud infrastructure, including physical security, network controls, and the underlying hardware. I am responsible for securing my data, managing user access, and configuring security settings for my applications and services running on Azure.
